

AQUANEERING

INCORPORATED

Design for Toxicology

Many toxicology researchers are turning to the zebrafish model for use in their studies because zebrafish provide rapid, relevant, and low-cost results. However, standard zebrafish housing systems might need customization to meet the requirements of toxicology testing.

Polyethylene Tanks are available in 50 Liter and 100 Liter sizes

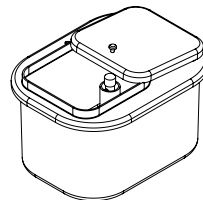

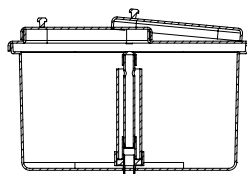

Aquaneering has the capability and experience to design custom systems to meet the biosecurity needs of your project at the rack, shelf, or tank level.

Clear Polycarbonate tanks available in 16 Liter
Clear PETG tanks available in 21 Liter
Glass tanks available in different sizes

Powder Coated
Stainless Steel Available

Side and top isometric view of the 50 Liter Tank

- **Sealed Tank Lids** prevent cross contamination from tank to tank
- **Enclosed Drain Plumbing** prevents splashing
- **Air Lines and Water Lines** secured at tank entry points
- **Recirculation and Flow-Through Options**
- Tanks available in *plastic or glass*

Rear of rack shows enclosed gutter system

Because Your Research Depends On It
