Coral Propagation System

- Loelines in tanks offer freedom to divert water flow where you need it
- Frag rack in each tank holds 238 frags
- Standpipes drain water from the tanks
- Valves on loelines and manifolds turn flow on and off as needed

- Versatility in lighting options - install any kind of light you need for your system
- Standard rack model is equipped with:
 - » 250 watt metal halide lights with 20K radium bulbs on top shelf
 - » Hydra FiftyTwo™ HD LED lights with built-in control on bottom shelf

- Four-stage filtration:
 - » Dacron pad particulate filter removes large debris from system water
 - » Fluidized bed biological filter with 1500 square feet of biofilm surface for undetectable levels of ammonia and nitrite.
 - » Carbon finishing filter removes contaminants and impurities from system water
 - » Protein skimmer maintains low nitrate levels crucial for coral health.
