

**AQUANEERING**  
**M3 TANK LINE**  
*MIX and MAX*

*House more lines of fish  
per square foot of lab space  
than ever before with  
new interchangeable sizes!*

3 New sizes introduced in 2008  
0.8 Liter, 1.8 Liter, 6.0 Liter

New 0.8 liter

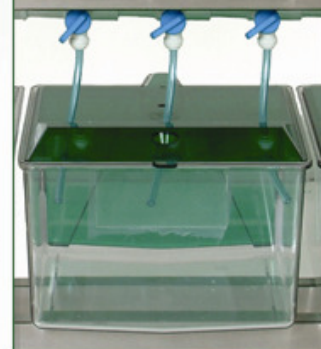

New 1.8 Liter

Existing 2.8 Liter

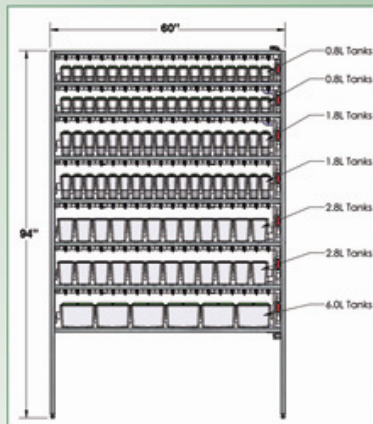

New 6.0 Liter

# M3 TANK LINE

ZAS 760 Rack

- Full welded 316L Stainless Steel
- Same number of valves per shelf offers Precise Water Control and ability to interchange sizes of tanks on each shelf.
- Stainless Steel adjustable feet

Low profile design allows seven shelves in the same elevation as six!

## MAXIMIZE FLEXIBILITY

Aquaneering's new line of zebrafish tanks offers caretakers the most flexibility. The new layout is as simple as 1-2-3! **One 6.0 Liter tank** can be replaced with **two 2.8 Liter tanks** which can be replaced with **three 1.8 Liter tanks**.

Additionally, all shelves have the same number of water delivery valves to allow for any configuration of tanks. **Mix and match** the 1.8, 2.8, and 6.0 tanks to allow unrestricted grouping of the fish by family, not by rack design constraints.

## MAXIMIZE SPACE

The new Aquaneering **0.8 Liter tanks** allow for isolated housing of small groups of fish (from 1-10). Maximum capacity with easier access has been achieved through the new **space saving 0.8 L tanks**. The shorter shelf requirement of the **0.8 Liter tanks** allows for seven shelves in the same elevation as six in past rack designs.

## MAXIMIZE CAPACITY

A wider footprint on the **1.8 liter tank** results in increased stability and increased water **capacity** per shelf. The new lid design keeps any food spillage well away from the water intake opening.

## RESULT:

*The most user friendly  
Aquatic Racking System*

0.8 Liter Tank

1.8 Liter Tank

Existing 2.8 Liter Tank

6.0 Liter Tank
